

WEEELABEX
CONFORMITY & VERIFICATION

Dear WEEELABEX Operator

As we are driven by our vision and thanks to the great effort of our Group of the Experts, market demand and future EU administrative requirements

the WEEELABEX Organisation has fully implemented

WEEELABEX Certification scheme – EURO B1801

into the Check list, Auditor manual and into the certification process. Certification scheme EURO B1801 is consisting from the published and implemented CENELEC requirements and the “Extra WEEELABEX requirements” as clearly defined in the B04 WEEELABEX guidance document.

Related to this, there was made a major update of the Check list and A04 Auditor manual to be fully compliant with the new scheme (including new relevant CENELEC standards).

In addition, some other major updates and changes were made.

Each stream is subject to specific standards requirements in our accredited scheme, please see the pro-link in detail:
